

**MOSES LAKE INDUSTRIES (TAMA CHEMICALS) RECEIVES INTEL'S
PRESTIGIOUS SUPPLIER CONTINUOUS QUALITY IMPROVEMENT
AWARD**

MOSES LAKE, Wash., March 3, 2010 – Moses Lake Industries has been recognized as one of 10 suppliers to receive Intel Corporation's prestigious Supplier Continuous Quality Improvement (SCQI) award. The award recognizes extraordinary commitment to quality and exceptional performance to Intel's goals and is the company's highest honor for its suppliers. In 2009 Moses Lake Industries provided ultra high purity process and performance chemicals deemed vital to Intel's success.

"This seventh consecutive Intel quality award is a huge honor for every MLI employee. This award recognizes the constant, unfailing dedication and competence of every MLI employee and the teamwork which binds us together personally and professionally. We also believe this award recognizes that in a terribly difficult year economically, MLI never stopped investing in people and equipment focused on the development of innovative, cost-effective, continuously improved cutting edge chemical products for Intel," said Michael Harvey, executive vice president and general counsel, Moses Lake Industries.

"Intel is very pleased to present Moses Lake Industries with the top Supplier Continuous Quality Improvement award for the fourth consecutive year," said Jim Harrison, director, Fab Materials Organization, Intel. "Moses Lake Industries continues to provide high quality materials and excellent customer support with focus on both formulated blends and developing leading edge technology. They have done an exemplary job and we congratulate Moses Lake Industries on continuing to earn this award."

The SCQI award is part of Intel's Supplier Continuous Quality Improvement program, which encourages Intel's key suppliers to strive for excellence and continuous improvement. To qualify for SCQI status, suppliers must score at least 95 percent on a

report card that assesses performance and ability to meet cost, quality, availability, delivery, technology and customer satisfaction goals. Suppliers must also achieve 90 percent or greater on a challenging improvement plan and demonstrate solid quality and business systems. Furthermore, this year's awardees demonstrated compliance to the Electronic Industry Citizenship Coalition Code of Conduct and Intel's Environmental Social Governance Program. Additional information about the SCQI program is available at <http://supplier.intel.com/quality>.

Celebrations to honor the SCQI award winners will be held in conjunction with Intel's Supplier Day events in Tokyo, Japan and Anaheim, California during the month of March 2010. In addition, an announcement will run in the March 31 U.S. edition and April 1 Europe and Asia editions of The Wall Street Journal with acknowledgement on Intel's corporate Web site, www.intel.com.

About Moses Lake Industries

Moses Lake Industries is a member of the Tama Chemical Group, a privately held basic manufacturer of high purity chemicals for the semiconductor, silicon and liquid crystal display industries. The company has extensive operations in North America, Asia, and Europe. The company produces photolithographic, plating, cleaning, doping, CMP and other specialized ultra-high purity chemicals. The company's customers include the world's leading producers of silicon wafers, semiconductors, and liquid crystal displays. Moses Lake Industries and Tama Chemical produce chemicals with unequalled purity and consistency. While some companies emphasize outsourcing, MLI-Tama maximizes internal vertical integration in order to maintain maximum quality and cost control.
